

DRIVING INNOVATION AND EXCELLENCE INTO THE FACTORIES OF THE FUTURE

Who We Are

Comau is a **worldwide leader** in delivering **advanced industrial automation products and systems**. Its comprehensive portfolio includes **technology and systems for electric, hybrid and traditional vehicle manufacturing, industrial robots, collaborative and wearable robotics, autonomous logistics, dedicated machining centers and interconnected digital services** able to transmit, elaborate and analyze machine and process data. With over **45 years of field-proven experience and a strong presence** within every major industrial country, Comau is helping manufacturers of all sizes in almost any industry experience higher quality, increased productivity, faster time-to-market and lower overall costs.

E-Mobility

Comau combines **standard, modular, scalable and flexible solutions** to fully support the **unique and evolving requirements of the E-Mobility sector**. With its ability to cover the **E-Manufacturing process from batteries, drivelines and parts machining up to full body assembly**, Comau is helping automotive companies move toward E-Vehicle manufacturing and emerging companies enter the market by supporting them throughout the entire life cycle of the program from product design to launch in production.

Innovation and Digital Transformation

Committed to the belief that **innovation drives the industry toward excellence**, Comau has transformed its approach by **making automation easier, more accessible, highly intuitive and fully interconnected**. This includes creating a **HUMANufacturing environment where industrial robots and machines cooperate in total safety with humans, and intelligent manufacturing systems** aided by wearable technologies and artificial intelligence. Comau innovation is leading the way as the world of manufacturing evolves to better accommodate the market changes and the challenges of digital transformation. Leveraging its profound knowledge of manufacturing, Comau is making factory processes quicker, more flexible and more reactive by deploying **digital products and solutions able to gather, analyze and utilize interconnected intelligence**.

Developing Competencies

Comau is made up of people and their know-how. The **Comau learning factory, Comau Academy, is recognized globally for developing competencies and new skills, with a special focus on digital transformation**. Its vast educational offering for companies, professionals and young talents has been developed in collaboration with the most distinguished international universities and learning institutions. Comau Academy's main models and tools are explained in three textbooks that have been translated into multiple languages. Its **interdisciplinary approach** to learning favors cognitive, emotional and sensory experiences using **e.DO™, Comau's portable, open-source, hands-on articulated robot**. Designed to integrate and consolidate key skill areas, the program allows students and adults to intuitively learn even the most complex curricular subjects as part of a fun and effective **e.DO™ Experience**.
