

A history rooted in excellence, a future driven by innovation.

17 countries
34 locations
15 manufacturing plants
9,000 employees
5 innovation centers

Who we are

Comau specializes in producing **advanced industrial automation solutions** that **integrate products, technologies and services** to help companies of all sizes increase plant efficiency while lowering operating costs and optimizing returns.

Comau's competence stems from **over 40 years of field-proven experience and a strong presence within every major industrial country**. The comprehensive offering of **modular, flexible and highly configurable products** is based on **open automation principles**, and can be tailored to meet the needs of each individual customer.

What we do

Technologies:

Comau designs and develops advanced technology solutions that drive the future of digital manufacturing

Products:

Comau products combine modern technological know-how and innovative engineering to ensure performance, precision and long-term reliability

Solutions:

Comau creates intuitive, easy to understand and easy to use solutions that keep automation simple while increasing quality and streamlining processes

Services:

Comau's international network of highly skilled technicians provide comprehensive and reliable management and maintenance support, helping its customers gain a competitive edge

Innovation

Comau believes that **innovation drives the industry toward excellence**. Several years ago, Comau embraced a future-focused approach, changing the way of thinking about the concept of industrial automation itself, transforming it into **open automation**. This means making automation **easier** and **more accessible**.

The principles of this **new era of automation** for Comau are: openness, intuitiveness, friendliness, ease of use and full connectivity, based on human-robot collaboration and continuous improvement in the machine to machine evolution.

Comau believes in the role that **style** and **design** can play in stimulating productivity and performance within an industrial environment. Comau's new design strategy is proof of its commitment to striving for excellence.

Comau Academy

Comau is made up of **people** and their **know how**.

Comau Academy, the learning factory which sums up its educational offering, is now recognized for competency development thanks to its **learning programs** for companies, professionals and young talents, developed in collaboration with the most distinguished international universities.

Comau Academy's main models and tools are explained in two **handbooks** that have been translated into multiple languages.
