

COMAU ROBOT CELL IS MADE FOR TRAINING AND TEACHING.

April 3-6, 2017 – Chicago – At Automate 2017 in booth 1650, Comau presents its new training cell, the ideal solution for teaching the basic principles of robotics and industrial automation. It is the perfect solution for training at its customers' premises and secondary schools, universities and research centers.

The cell's reduced size, with the Racer3 robot, also means that it can easily be transported from one training location to another.

Technologically, the cell integrates a number of features that make it really one of a kind. The Racer3, the smallest anthropomorphic robot in Comau's family, is particularly suited for teaching both theory and practice. The structure itself is equipped with a video camera which transmits its image to a monitor mounted outside the work area. This enables the teacher to train even large groups, while ensuring that no one is left behind. The work table, developed by Comau for this application, is drilled to accept a variety of options with a quick release locking system.

The mobile training cell adds a new option to Comau's offering for training and teaching at all levels, and confirms the company's commitment not only to manufacturing innovative solutions, but also to the construction of a genuine culture of automation.

About Comau:

Comau, a member of the FCA Group, is a worldwide leader in delivering advanced industrial automation solutions that integrate products, technologies and services to help companies of all sizes increase plant efficiency while lowering operating costs and optimizing returns. Headquartered in Turin, Italy, Comau has over 40 years of factory-proven experience, and an international network of 34 locations, 15 manufacturing plants and 5 innovation centers that span 17 countries and employ more than 9,000 people. With a strong focus on innovation, Comau is committed to developing competency through the formation of individuals and groups as part of its open automation approach. Comau is driving the future of production automation by engineering lean and sustainable solutions and products. Its modular, flexible and highly-configurable products can be tailored to meet the needs of each individual customer. Through the continuous development of products and services, Comau is able to lead the automation industry in every phase of a project - from design, implementation and installation, to production start-up and maintenance services. Its comprehensive offering includes manufacturing and assembly solutions, powertrain machining, robotics and asset maintenance services for a wide range of industrial sectors.
