

COMAU PRESENTS INNOVATIVE LHYTE TECHNOLOGY AT LASER WORLD OF PHOTONICS

At this year's Laser World of Photonics in Munich, the international trade fair for Photonics Components, Systems and Applications, Comau presents its new laser technology for the first time to the German audience in Hall A3 Booth 151.

Turin, June 26, 2017 – LHYTE (Laser HYbrid Technology) is Comau's new technology developed in collaboration with Prima Electro and designed for industrial laser applications. The cutting-edge modular system, which is intended for both the automotive and general industry sectors, allows its end users to choose a fiber, diode or hybrid laser source. With this innovative technology, Comau hereby reacts to the growing demands of the market and meets the increasingly varied and flexible needs of the industrial sector.

“Our new laser source offers high flexibility to the end customers due to the use of only one laser source for different laser applications such as cutting, welding and brazing”, says Tobias Daniel, Head of Sales and Marketing at Comau Robotics and Automation Products.

With LHYTE, Comau offers a unique, patented solution that is able to combine the potential of direct and fiber laser sources through a modular and flexible structure. The system is adaptable to any industrial application and enables Comau to meet the needs of a market in continuous evolution, in which manufacturers and system integrators are constantly in search of high-performance, versatile technologies. This innovative system is also an expression of high-quality Italian design as well as the result of the development skills of one of the world's leading global automation companies, Comau, and

of Prima Electro, a company of international importance in the design of electronic components and laser technologies

Made in Comau

About Comau:

Comau, a member of the FCA Group, is a worldwide leader in delivering advanced industrial automation solutions that integrate products, technologies and services to help companies of all sizes increase plant efficiency while lowering operating costs and optimizing returns. Headquartered in Turin, Italy, Comau has over 40 years of factory-proven experience, and an international network of 35 locations, 15 manufacturing plants and 5 innovation centers that span 17 countries and employ more than 9,000 people. With a strong focus on innovation, Comau is committed to developing competency through the formation of individuals and groups as part of its open automation approach. Comau is driving the future of production automation by engineering lean and sustainable solutions and products. Its modular, flexible and highly-configurable products can be tailored to meet the needs of each individual customer. Through the continuous development of products and services, Comau is able to lead the automation industry in every phase of a project - from design, implementation and installation, to production start-up and maintenance services. Its comprehensive offering includes manufacturing and assembly solutions, powertrain machining, robotics and asset maintenance services for a wide range of industrial sectors.
