

## COMAU PROMOTES PTWA AT GLOBAL AUTOMOTIVE LIGHTWEIGHT MATERIALS SUMMIT

PRESS RELEASE

*Detroit, August 22, 2017* – Comau will present and exhibit at the 6th annual Global Automotive Lightweight Materials Summit (GALM) taking place at Cobo Center. This event is North America’s largest automotive lightweighting summit and exhibition showcase, and focuses on new materials and cutting edge technologies for the benefit of automotive OEMs.

Paulo Rosa, Manager of Advanced Thermal Spray Process and Product Development, will be presenting on Comau’s Plasma Transferred Wire Arc (PTWA) process. This thermal coating method allows automakers to harness the full benefits of aluminum engine blocks, which is why Comau integrates the PTWA process directly within its production solutions. The presentation will address the application of the thermal spray process to lightweight components and its benefits.

For more information on the event, visit <http://www.global-automotive-lightweight-materials-detroit.com/>.

Made in Comau

**About Comau:**

Comau, a member of the FCA Group, is a worldwide leader in delivering advanced industrial automation solutions that integrate products, technologies and services to help companies of all sizes increase plant efficiency while lowering operating costs and optimizing returns. Headquartered in Turin, Italy, Comau has over 40 years of factory-proven experience, and an international network of 35 locations, 15 manufacturing plants and 5 innovation centers that span 17 countries and employ more than 9,000 people. With a strong focus on innovation, Comau is committed to developing competency through the formation of individuals and groups as part of its open automation approach. Comau is driving the future of production automation by engineering lean and sustainable solutions and products. Its modular, flexible and highly-configurable products can be tailored to meet the needs of each individual customer. Through the continuous development of products and services, Comau is able to lead the automation industry in every phase of a project - from design, implementation and installation, to production start-up and maintenance services. Its comprehensive offering includes manufacturing and assembly solutions, powertrain machining, robotics and asset maintenance services for a wide range of industrial sectors.
