

COMAU AT MSV BRNO. WHEN ITALIAN ELEGANCE MEETS HIGH TECH TRENDS

Brno, Czech Republic, October 3, 2017 – Comau will showcase its cutting-edge robot technologies dedicated to arc welding, spot welding, pick & place applications and 3D printer support at MSV Brno on October 9-13, 2017.

A welding station equipped with a Racer7 - 1.4 robot, welding components, orbital positioner and, additionally, an NJ40 robot will be presented in Hall G2, Booth 01. The welding station was designed and integrated by Comau.

To reconfirm the rich know-how of Comau in the field of welding, the Spot Welding Machine, an exclusive Comau technology featuring an integrated welding gun and patented hollow wrist technology, will be displayed. These machines are used in many FCA Group facilities, helping to connect together chassis structure, e.g.: Fiat 500 in Tychy and Maserati Quattroporte in Italy.

The small family of robots also play an important role in the Comau portfolio and cannot be missed at MSV. Comau introduces Racer3, Racer5 and Rebel-S. The small robots offer a reduced layout and footprint, full integration between all robots in a single line and total control of each robot by the R1C lightweight 19" rack, employing cutting edge control technology and integrated Powerlink bus communications. Do not miss the chance to see the Racer5 robot at the entrance to Pavilion P.

3D printing is now a hot topic in the industry and Comau will use Racer7 – 1.4 for this application. Thanks to its very high accuracy and lengthy reach, the robot can precisely lead the filament on a programmed path before creating a variety of 3D models.

PRESS RELEASE

From SCARA robots through articulated small payload robots, welding robots, and large robots equipped with welding guns, Comau's range of solutions is very broad. Our robots are suitable for the automotive industry, as well as for the general market where investment returns, quality, performance and production cycles play a large role. Our products perform various activities, but one thing they have in common - they bring our customers' businesses to the next level.

Made in Comau

PRESS RELEASE

About Comau:

Comau, a member of the FCA Group, is a worldwide leader in delivering advanced industrial automation solutions that integrate products, technologies and services to help companies of all sizes increase plant efficiency while lowering operating costs and optimizing returns. Headquartered in Turin, Italy, Comau has over 40 years of factory-proven experience, and an international network of 35 locations, 15 manufacturing plants and 5 innovation centers that span 17 countries and employ more than 9,000 people. With a strong focus on innovation, Comau is committed to developing competency through the formation of individuals and groups as part of its open automation approach. Comau is driving the future of production automation by engineering lean and sustainable solutions and products. Its modular, flexible and highly-configurable products can be tailored to meet the needs of each individual customer. Through the continuous development of products and services, Comau is able to lead the automation industry in every phase of a project - from design, implementation and installation, to production start-up and maintenance services. Its comprehensive offering includes manufacturing and assembly solutions, powertrain machining, robotics and asset maintenance services for a wide range of industrial sectors.
