E-Mobility from Body to Power Systems

A partner capable of managing
the whole manufacturing process

Assembly and Machining Systems for **Sub-Process**
as well as the entire **E-Drive-line**

Production Systems for **manual and automatic**
transmissions machining and assembly

Assembly and Machining Systems
for **Battery Modules**
and **Battery Pack**

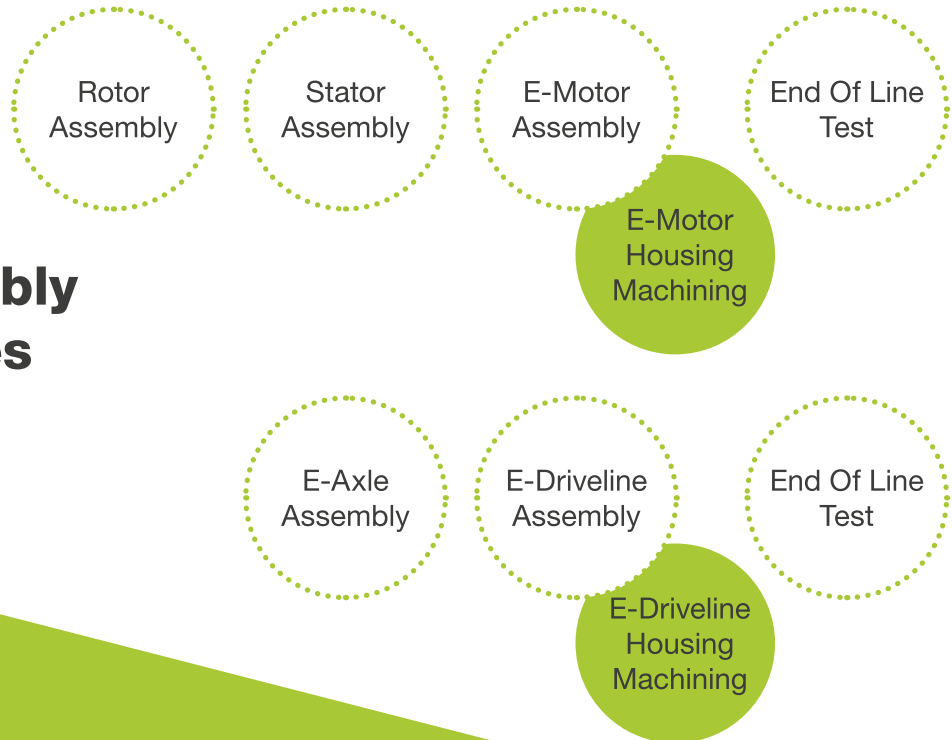

Production Systems
for **Body Assembly**

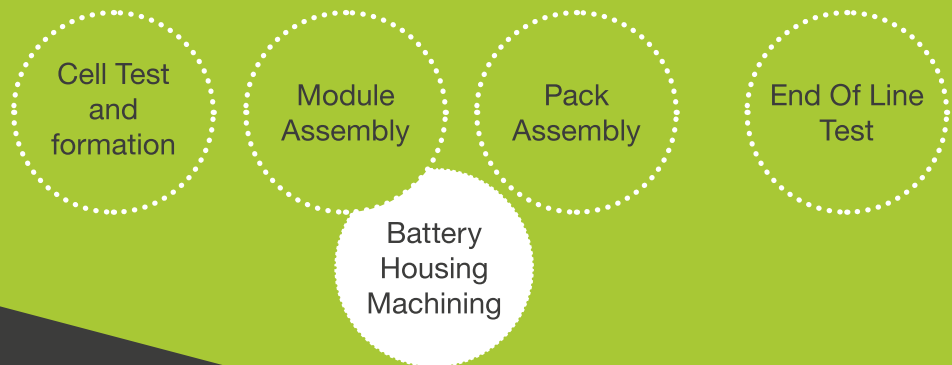

Production Systems for
Internal Combustion Engine
Assembly and Machining

OUR OFFER

E-Drivelines Assembly and Machining Lines

Battery Assembly and Machining Lines

Specific Technologies

- Laser Source (Comau Lhyte)
- Vision Systems and Thermography for welding check
- Digital & Industry 4.0 Ready
- Internal laser welding Laboratory for process validation and set-up and prototype production
- Complete portfolio of Robotic Solutions for all industries
