

## COMAU UNVEILS MYMR, A SCALABLE AUTONOMOUS MOBILE ROBOT FAMILY ENGINEERED TO OPTIMIZE INTRALOGISTICS EFFICIENCY

- Comau is launching three new Autonomous Mobile Robots – with payloads ranging from 300kg to 1.5 tons, for enhanced intralogistics and warehouse automation
- Flexible, scalable, and infrastructure-free, MyMR robots offer hybrid navigation (AMR/AGV) and intelligent fleet management, enhancing productivity without requiring facility modifications
- Engineered for next-generation manufacturing and material handling across diversified industries, MyMR supports the evolution toward agile production flows and reconfigurable factories
- The solution combines Comau's robotics expertise and system integration capabilities in a single turnkey offering that integrates seamlessly with existing systems
- By reducing deployment times, improving collaborative safety, and lowering handling costs, MyMR delivers measurable value and a fast return on investment

**Grugliasco (Italy), June 24, 2025** – Comau, a global leader in advanced industrial automation, will launch its MyMR family of Autonomous Mobile Robots (AMRs) at Automatica 2025 (Munich, Germany, June 24-27), the leading international trade fair for automation and robotics. Engineered to meet the increasing demands of intralogistics across manufacturing, warehousing, logistics and highly automated environments, the MyMR platform addresses key challenges such as labor shortages, material handling inefficiencies, and safety concerns with a modular, scalable and fully autonomous solution.

Unlike traditional automation systems or manual handling processes, MyMR offers advanced features such as intelligent fleet management, real-time obstacle avoidance and seamless line integration. With three distinct models offering payload capabilities of 300 kg, 500kg and 1,500 kgs, Comau's AMRs support a broad range of logistics tasks from production line supply to warehouse automation and kitting. The advanced navigation system allows them to dynamically adapt to layout changes, enhancing flexibility and operational uptime without requiring dedicated infrastructure or predetermined trajectories.

Designed to support diversified industries, MyMR reflects Comau's vision of the mobile, digitally connected factory. The platform enables safe human-machine collaboration, empowering decentralized, agile production flows while ensuring that the AMRs and workers operate work side-by-side to optimize productivity and responsiveness.

In addition to the three AMR models that comprise the MyMR family, Comau offers standard attachments such as lifters, conveyors, shelving and other accessories to address a full range of warehouse automation and intralogistics needs. Furthermore, MyMR robots can be easily converted from an Autonomous Mobile Robot to an Automated Guided Vehicle thanks to their advanced software configuration. This enables additional flexibility and functionality as the customers' needs change.

*"The global debut of MyMR robot family at Automatica underscores our commitment to redefining intralogistics through intelligent, mobile automation,"* said Nicole Clement, Chief Business Unit Leader - Advanced Automation Solutions of Comau. *"AMRs and AGVs are expected to become one of the fastest-growing segments within industrial automation, reaching a CAGR of 31% through 2027 according to our estimates. By adding this essential automation enabler within our vast product portfolio, Comau now has a complete, integrated ecosystem to help our customers enhance flexibility, safety, and efficiency across the intralogistics value chain."*

#### ABOUT COMAU

Comau is a worldwide leader in delivering sustainable advanced automation solutions. With 50+ years of experience and a global presence, Comau is helping companies of all sizes in almost any industry leverage the benefits of automation. Backed by a continuous commitment to designing and developing innovative and easy to use technologies, its portfolio includes products and systems for vehicle manufacturing, with a strong presence in e-Mobility, as well as advanced robotics and digital solutions to address rapidly growing markets in industrial sectors. The company's offering also extends to project management and consultancy. Through the training activities organized by its Academy, Comau is committed to advancing the technical and managerial knowledge necessary to face the challenges related to automation and leverage the opportunities of a constantly changing marketplace. Headquartered in Turin, Italy, Comau has an international network of 7 innovation centers and 11 manufacturing plants that span 11 countries and employ 3,800+ people. Together with its wide network of distributors and partners, the company is able to respond quickly to the needs of its customers, no matter where they are located throughout the world.
