MATE-XB

**Muscular Aiding Tech
Exoskeleton**

MATE-XB – Certified Category IIInd PPE

MATE-XB is a **Category IIInd Personal Protective Equipment (PPE)** certified according to **(EU) Regulation 2016/425**. It provides **safety, comfort, and performance**, supporting workers across all professional environments.

Certification Benefits:

- Compliant with European standards for safety and musculoskeletal protection.
- Tested and approved to reduce work-related risks.
- Suitable for professional settings where certified PPE is required.

Key Features:

- Ergonomic back support for the worker.
- Reduces fatigue during lifting, repetitive tasks, or prolonged awkward postures.
- Enhances workplace safety and compliance

WHAT IS MATE-XB?

MATE-XB is a **non-powered** exoskeleton for relieving the muscular effort at the **lumbar district** for workers who need to move weights or maintaining a bent posture for a prolonged period. It supports the user while working in **different positions**, e.g., when bending with the legs (squatting), bending forwards, or repetitive lifting of loads. The device is **designed to reduce back strain** during these activities and **improve the quality** of the user's work experience.

TORQUE GENERATING BOX (TGB)

Core mechanism that stores and transforms energy in order to create an adjustable assistive torque.

- The assistance replicates the physiological action of the hip during trunk flexion
- Gentle assistance up to 25 kg
- Possibility of tuning the amount of support over 5 levels
- No hindrance while walking

GARMENT INTERFACE

All parts in direct contact with the user's body.

- Breathable and bio-compatible materials
- Wide contact area to distribute reaction forces without causing high-force points

MECHANICAL KINEMATIC CHAIN

Structure that facilitates the free movement of the user.

- The device allows the user to move the trunk freely
- The passive kinematic chain is designed to be compact around the human body
- The passive kinematic chain is designed to deal with the human-exoskeleton kinematic compatibility

HOW DOES IT WORK?

MATE-XB GIVES YOU THE EXACT LEVEL OF SUPPORT WHEN AND WHERE YOU NEED IT

The assistance provided by the MATE-XB exoskeleton mimics the effect of the trunk flexion on the lower back.

MATE-XB MOVES IN HARMONY WITH YOUR BODY

Thanks to a chain of passive degrees of freedom, the exoskeleton allows the whole user's freedom of movement.

JUST THE WAY YOU DO

MATE-XB FITS YOUR BODY GIVING YOU THE FREEDOM TO MOVE

MATE-XB WORKS WHEN, WHERE AND HOW YOU DO.

EXTREMELY ERGONOMIC, EVERYWHERE

**FULL MOBILITY
OF THE ENTIRE BODY**

**EASY SELECTABLE
ASSISTANCE**

**LIGHTWEIGHT AND
ROBUST STRUCTURE**

COMPACT DESIGN

**EASY ENABLE/
DISABLE SWITCH**

**FAST DONNING
AND DOFFING**

**HIGH
PERSONALIZATION/FITTING**

**INTUITIVE AND
EASY-TO-USE ADJUSTMENTS**

EXTERNAL RESISTANCE

**DUST
& DIRT**

WATER

**OUTDOOR
ENVIRONMENT**

**SALT SPRAY
TESTED**

WHY IS MATE-XB UNIQUE?

FOR WORKERS

REDUCED MUSCULAR EFFORT

35% ↓
ON THE
BACK

Using MATE generates a steady reduction in back muscle activation during activities, reducing muscular strain

PERCEIVED EFFORT REDUCTION

50% ↓
ON THE
LOW BACK
ZONE
PERFORMING ACTIVITIES

Workers' perception highlighted high correlation between perceived strain reduction and the measured reduced muscular effort

FOR COMPANIES

**POSITIVELY
IMPACT YOUR
ERGONOMICS**

**LOW-COST
FLEXIBLE
ERGONOMIC
SOLUTION**

**DEPLOYABLE IN
AREAS WHERE
AUTOMATION IS
NOT POSSIBLE**

**ADDRESS
WORK-RELATED
MUSCULOSKELETAL
DISORDERS**
