

SMART AUTOMATION FOR MULTIPLE INDUSTRIES

About Comau

Comau is a **worldwide leader in delivering advanced automation solutions across diverse industries**. Together with Automha, a fully owned company specializing in global intralogistics and warehousing automation, Comau is enabling companies to **unlock the full potential of automation, robotics, and digital technologies** – and to increase their efficiency, flexibility, and competitiveness in rapidly growing markets.

Comau's portfolio includes **products and systems for vehicle manufacturing**, with a strong presence in e-Mobility, as well as **cutting-edge robotics** and digital solutions. Automha develops intelligent, high-performance **automated storage and retrieval handling systems** that optimize efficiency and reliability.

Operations

| | | | |
|---|--------------------------|-------------------------------------|--|
| +43,000 Installed Machines | +1,200 Patents | +300 Projects Per Year | +180 Clients with Comau technologies Per Year |
|---|--------------------------|-------------------------------------|--|

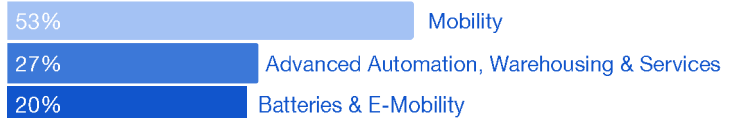

Organization

| | | | |
|------------------------|-----------------------------------|--------------------------------------|---|
| 12 Countries | 8 Innovation Centers | 14 Manufacturing Plants | +4,000 employees worldwide |
|------------------------|-----------------------------------|--------------------------------------|---|

Innovation Network

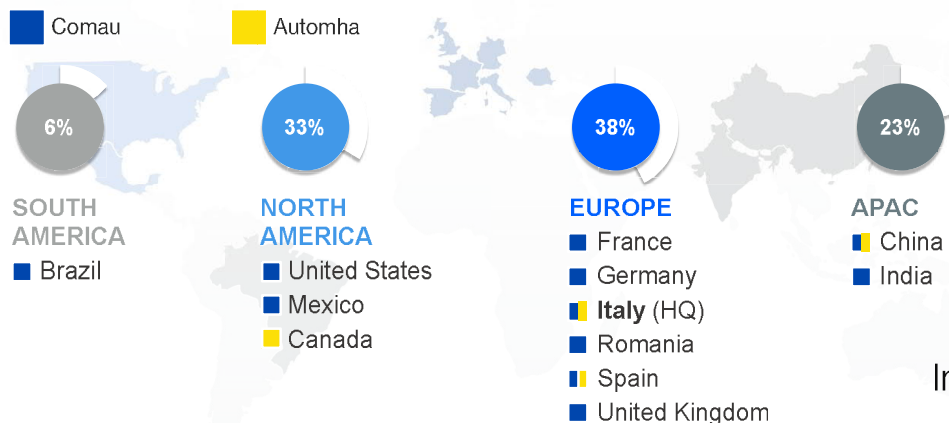

Comau is a key protagonist within a vast innovation network that includes **universities, research institutes, competence centers, industry associations, and global technology companies**. The underlying goal is to create shared knowledge applied to next-generation technologies.

Business by end markets (2025)

Strategically Located Close To Clients

Proven automation expertise in industries where performances and time to market are critical elements

(%) Revenues by Region (2024)

AUTOMHA

In 2025, Comau acquired Automha, a global company specializing in **intralogistics and warehouse automation**

INTECELLS*

In 2025 Comau invested in Intecells to develop a **new paradigm in battery electrode manufacturing**

Industrial heritage, global network and diversified capabilities

Business Areas

Advanced Automation Solutions

A **wide portfolio** of proprietary products including industrial robots, collaborative robots, mobile and wearable robotics; AI-enabled vision systems and cognitive applications.

Delivering advanced automation solutions across diverse sectors: heavy industry (aerospace, energy, naval) **light industry** (food& bev), **RES** (hydrogen production/utilization, solar, wind)

Academy & Education

Programs for the development of technical, managerial skills, and professional retraining. **The e.DO™ educational platform is also used for robotic welding training (addressing the shortage of specialized professionals).**

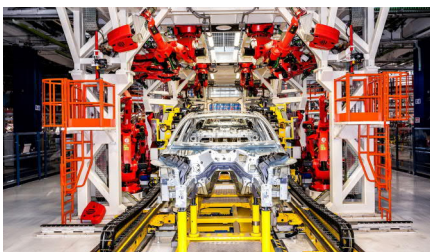

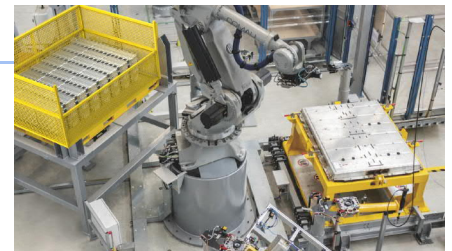

Warehousing, Logistics and Services

High-performance, **fully customized automated warehouses**, including AS/RS and shuttle systems, that optimize space and improve efficiency; in-house software for **intelligent warehouse management**, including Automha Warehouse Management System and an integrated SCADA system for real-time monitoring.

Batteries and E-Mobility

Automation solutions for electric mobility ranging from batteries (cell activation to module and pack assembly, including next-generation batteries such as solid-state, and solutions for battery disassembly and reuse) to electric motors/transmissions.

Multiple major projects including Gigafactory and BESS clients.

Automotive and Mobility

A portfolio of process technologies that support the entire production chain in the automotive sector; strong ties with traditional car manufacturers, emerging companies, and component suppliers.

Among the Top 5 Body-in-White automation providers in the auto industry.

Corporate Sustainability

Comau's commitment to environmental responsibility extends to **helping its employees, customers and suppliers work more efficiently to reach their set sustainability objectives.**

In addition to developing and delivering advanced technological solutions and increasingly efficient production processes, **Comau** is managing its worldwide operations with **the aim of reducing its environmental footprint.** This includes using 52% renewable electric energy, among other things, and the assessment of the Company's sustainability strategy with EcoVadis for which Comau has been awarded with a bronze medal.

Similarly, the company actively encourages a **fair and inclusive working environment** where individuals feel safe and are valued for their contributions.
