

SMART AUTOMATION FOR MULTIPLE INDUSTRIES

About Comau

Comau is a **worldwide leader in delivering advanced automation solutions** for diverse industries. The company designs and develops products and systems that help customers **improve productivity, flexibility, and competitiveness** – all while keeping sustainable production at the forefront.

Comau's technology portfolio includes products and solutions for vehicle manufacturing, with strong competencies in **batteries and e-Mobility, cutting-edge robotics and digital solutions** for various sectors such as logistics, distribution and fulfillment, renewable energies and storage, shipyards, aerospace, heavy industry, food & beverage, pharma and more. Together with fully owned companies Automha and Invent, Comau's **end-to-end automation and intralogistics capabilities** span manufacturing, storage, distribution, and material flow optimization.

Innovation network

Comau is a key protagonist within a vast innovation network that includes **universities, research institutes, competence centers, industry associations, and global technology companies**. The underlying goal is to create shared knowledge applied to next-generation technologies.

invent
smart intralogistics solutions

In 2026 Comau acquired **Invent**, a Brazilian intralogistics and warehouse automation solutions company

AUTOMHA

In 2025 Comau acquired **Automha**, an Italian company specializing in **intralogistics and warehouse automation**

INTECELLS

In 2025 Comau invested in the US startup **Intecells** to develop a **new paradigm in battery electrode manufacturing**

IUVO

In 2017 Comau invested in the Italian startup **IUVO**, acquiring a majority stake in a JV with **Össur**, to **co-develop wearable technologies**

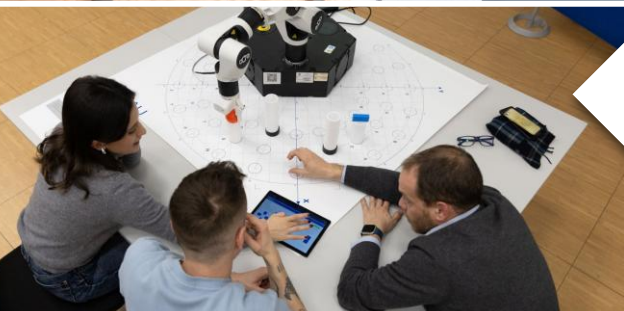

Key business areas

Proven automation expertise in industries where performance and time to market are critical elements

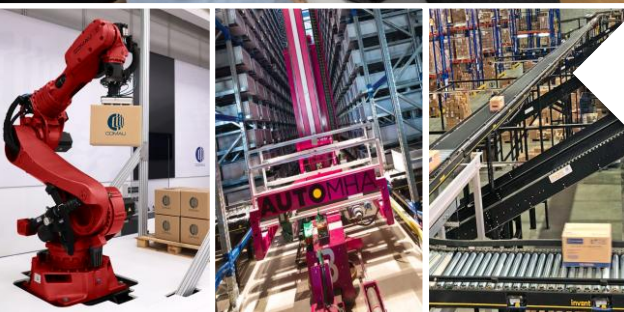

Advanced automation solutions

A **wide portfolio** of proprietary products including industrial robots, collaborative robots, mobile and wearable robotics (**with IUVO**), **AI-enabled vision systems** and cognitive applications. Comau delivers **advanced automation solutions** across diverse sectors including **heavy industry** (aerospace, energy, naval), **light industry** (food&beverage), and **RES** (hydrogen production/utilization, solar, wind).

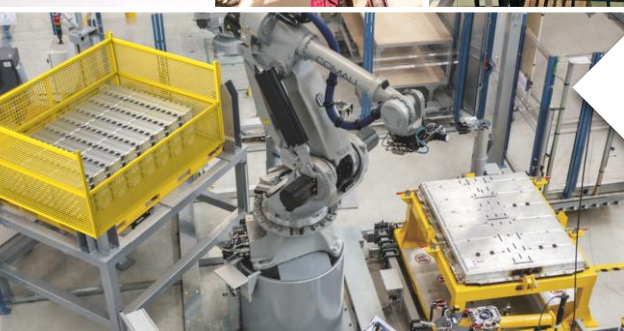

Academy and education

Programs for the development of technical and managerial skills, and for professional retraining. The **e.DO™ educational platform** is also used for **robotic welding training** (addressing the shortage of specialized workers).

Warehousing, logistics and services

Fully customized **high-performance automated warehouses**, including AS/RS and shuttle systems, that optimize space and improve efficiency. In-house software for **intelligent warehouse management**, including the Automha Warehouse Management System, Invent's AI-driven intelligent orchestration software for intralogistics optimization, and an **integrated SCADA system** for real-time monitoring.

Batteries and E-Mobility

Automation solutions for electric mobility ranging from batteries (**cell activation to module and pack assembly**, including solid-state and next-generation batteries, and solutions for **battery disassembly and reuse**) to **electric motors/transmissions**.

Proven expertise in large-scale projects including **gigafactories** and **BESS**.

Automotive and mobility

A portfolio of **process technologies** that support the **entire production chain** in the automotive sector; strong ties with traditional car manufacturers, emerging companies, and component suppliers.

Among the **Top 5 Body-in-White automation providers** in the industry.

Corporate sustainability

Comau drives environmental and social responsibility by helping employees, customers, and suppliers reach their sustainability goals. Furthermore, the company actively promotes a fair, safe, and inclusive workplace.
