

Press Release

Comau extends its intralogistics platform by acquiring Invent Smart Intralogistics Solutions

- *Comau has completed its acquisition of Invent Smart Intralogistics Solutions (“Invent”), a Brazilian specialist in warehouse and intralogistics technologies*
- *The transaction strengthens the Comau–Automha ecosystem by adding intelligent orchestration software and AI-driven logistics capabilities*
- *Invent will continue operating under its current management structure and business model*
- *The strategic investment marks another step in Comau’s strategy of building a globally connected automation hub with advanced technologies and Italian roots*

Turin, São Paulo – July 7 , 2026 – Comau announced today that it has acquired 100% of Invent Smart Intralogistics Solutions (“Invent”), a Brazilian company recognized for its expertise in warehouse automation and intralogistics technologies. The strategic investment strengthens Comau’s position in a rapidly expanding market, projected to grow by approximately 13% annually over the next three to five years, where customers are increasingly demanding integrated solutions that seamlessly connect production, storage, and material flow. Together with Automha, the addition of Invent broadens Comau’s ability to support the evolving requirements of distribution centers, fulfillment operations, and industrial logistics facilities with end-to-end automation capabilities. By leveraging Invent’s software-driven warehouse orchestration approach, Automha’s automated storage technologies and Comau’s automation expertise, the companies will be able to deliver increasingly intelligent and connected intralogistics solutions. Where Automha primarily specializes in pallet handling and automated storage systems, Invent brings advanced expertise in box handling, order fulfillment and logistics orchestration, enabling Comau to offer a robust, comprehensive intralogistics portfolio.

As supply chains become more dynamic and order fulfillment requirements continue to increase, companies are looking for technologies that can improve visibility, responsiveness, and operational efficiency. The combination of Comau, Automha and Invent creates a comprehensive portfolio capable of managing end-to-end material flows, from automated storage and order preparation through execution, movement, and process optimization.

The acquisition also enhances Comau’s footprint in strategic growth regions. In addition to strengthening the company’s presence in Latin America, Invent provides valuable access to the U.S. mid-market intralogistics segment, where demand for automation solutions continues to accelerate (up to 15% annual growth in the US; up to 17% in Brazil over the next 3 to 5 years).

Invent will continue to operate with its existing organization, leadership team and strategic direction, ensuring continuity for customers, partners and employees while benefiting from the scale and global reach of the broader Comau ecosystem.

Pietro Gorlier, CEO of Comau said. *“Our acquisition of Invent represents another milestone in Comau’s journey to build a comprehensive automation platform capable of supporting customers in one of the most*

dynamic segments of the logistics market – a market that is also undergoing a profound transformation driven by digitalization, e-commerce growth and the need for greater operational flexibility. Integrating Invent within our global network allows Comau to expand its market presence while adding highly complementary technologies and software expertise, strengthening our ability to deliver intelligent, end-to-end solutions connecting manufacturing, warehousing, and material handling operations.”

“This new chapter allows us to accelerate the development and deployment of our technologies while maintaining the innovative spirit and customer focus that have characterized Invent since its foundation,” added Leonardo Araki, CEO of Invent. “By becoming part of Comau, we gain access to global resources, industrial expertise and new market opportunities that will help us further enhance our solutions and create additional value for customers operating in increasingly complex logistics environments.”

ABOUT COMAU

Comau is a worldwide leader in delivering advanced automation solutions. The company designs and develops products and systems that help customers improve productivity, flexibility, and competitiveness across a wide range of industries – all while keeping sustainable production at the forefront. Comau also offers project management, consultancy services and, through its Academy, innovative training.

The company’s technology portfolio includes products and solutions for vehicle manufacturing, with strong competencies in batteries and e-Mobility, as well as cutting-edge robotics and digital solutions for a variety of sectors such as logistics, distribution and fulfillment, renewable energies and storage, shipyards, aerospace, heavy industry, food & beverage, pharma and more. Together with fully owned companies Automha and Invent, Comau’s end-to-end automation and intralogistics capabilities span manufacturing, storage, distribution, and material flow optimization. Automha specializes in intelligent, high-performance automated storage and retrieval systems, while Invent provides advanced picking and sorting technologies, material handling systems, and warehouse control software. Together, these complementary capabilities help optimize logistics operations and enhance distribution performance.

Comau is headquartered in Turin, Italy, Automha in Bergamo, Italy, and Invent in São Paulo, Brazil. The combined global footprint spans 9 innovation centers and 15 production facilities across 12 countries, supported by more than 4,000 employees worldwide.
