

FRANCESCO ALLEGRA APPOINTED CHIEF EXECUTIVE OFFICER OF AUTOMHA

Grugliasco (Turin), September 16, 2026 – The Board of Directors of Automha has named Francesco Allegra Chief Executive Officer of the company. The appointment, which has already taken effect, supports the expansion and strengthening of Automha's growth within Comau, which includes capitalizing on the synergies with Invent.

The intralogistics sector is expected to achieve double digit growth over the next three to five years, driven by the continued expansion of e-commerce and the evolution of supply chains. As such, Francesco Allegra will build on the company's strong track record to enhance its integrated logistics automation offering, allowing Automha to take on larger-scale projects, reach new markets and create new opportunities around the world.

Francesco Allegra, Chief Executive Officer of Automha, stated, "In assuming the leadership of Automha, my focus will be on realizing the company's full potential. I have seen firsthand the strengths of the team and technologies, as well as the market opportunities that lie ahead. By working together with Comau and Invent as a single technology hub, we are well-positioned to drive transformation and the optimization of production processes of our customers around the world."

Francesco Allegra brings two decades of executive leadership in operational excellence, risk management, and corporate governance. He holds a degree in Management Engineering from Politecnico di Torino and has held senior executive roles within FCA, Geox, and Comau. Allegra will retain his current position as Chief Operational Performance Officer at Comau, ensuring seamless strategic alignment across both organizations.

Francesco Allegra succeeds Automha founder Franco Togni, who transitions to the role of Honorary Chairman, continuing to support the business.

ABOUT COMAU

Comau is a worldwide leader in delivering advanced automation solutions. The company designs and develops products and systems that help customers improve productivity, flexibility, and competitiveness across a wide range of industries – all while keeping sustainable production at the forefront. Comau also offers project management, consultancy services and, through its Academy, innovative training.

The company's technology portfolio includes products and solutions for vehicle manufacturing, with strong competencies in batteries and e-Mobility, as well as cutting-edge robotics and digital solutions for a variety of sectors such as logistics, distribution and fulfillment, renewable energies and storage, shipyards, aerospace, heavy industry, food & beverage, pharma and more. Together with fully owned companies Automha and Invent, Comau's end-to-end automation and intralogistics capabilities span manufacturing, storage, distribution, and material flow optimization. Automha specializes in intelligent, high-performance automated storage and retrieval systems, while Invent provides advanced picking and sorting technologies, material handling systems, and warehouse control software. Together, these complementary capabilities help optimize logistics operations and enhance distribution performance.

Comau is headquartered in Turin, Italy, Automha in Bergamo, Italy, and Invent in São Paulo, Brazil. The combined global footprint spans 9 innovation centers and 15 production facilities across 12 countries, supported by more than 4,000 employees worldwide.
